Illuminating the subconscious and blending scale with mythology, painter [Farrell Brickhouse](#) finds the ultimate way to move viewers with his new solo exhibition. He's been honing his painting process for over 35 years, infusing personal stories and authenticating his purpose. [Life On Mars Gallery](#) has also created a [19-plate color catalogue](#) of his works, including an essay by art historian Robert C. Morgan to accompany the exhibition.

The gallery's Project Room will also feature works by James Prez, showcasing more of a design aesthetic compared to Brickhouse's intimate paintings.
