Discover the worlds within [Fran O'Neill's "painting her way home"](#) as part of [Life On Mar's](#) first exhibition of 2015, also featuring Benjamin Pritchard in LOM's Project Room. O'Neill's sensual works on paper and large-scale gestural paintings pack her works with emotion; "bold and intimate, full of color and movement, with an immediacy and simplicity in the mark, the work draws us into her world of seeing," (LOM). In Pritchard's works another intimacy of scale takes place, bending the language of abstract painting into a most personal and singular expression. Minute and intense adjustments reveal his search for truth and meaning amid the rapidity of the surrounding works.
